

SAIRA BATOOL

Full-Stack SaaS Engineer | ERP & Multi-Tenant Systems | Agentic AI & Workflow Automation

ssairabatool98@gmail.com | linkedin.com/in/saira-batool | Pakistan

PROFESSIONAL SUMMARY

Full-Stack SaaS Engineer with 4+ years of experience building production web applications, multi-tenant ERP/SaaS systems, REST APIs, and business workflow automation. Delivers full-stack products using Python, FastAPI, React, Node.js, and MySQL, with practical work in authentication, RBAC, and administrative dashboards. Hands-on with Agentic AI and LLM-powered applications, including RAG-based knowledge retrieval, AI customer support, and automated ticket/escalation workflows. Complements product engineering with strong QA automation: Pytest, Selenium, Playwright, API automation, and CI/CD (GitHub Actions, Azure DevOps, Jenkins). Focused on reliable, testable, production-quality software.

CORE EXPERTISE

SaaS & ERP Engineering: Multi-Tenant SaaS Architecture · ERP Application Development · Role-Based Access Control · Authentication & Authorization · Business Workflow Systems · Admin Dashboards

Agentic AI & Automation: AI Agents · Agentic Workflows · LLM-Powered Applications · RAG · AI Customer Support · Business Workflow Automation

Full-Stack Engineering: Python · FastAPI · React · Next.js · Node.js · Express.js · REST APIs · MySQL · SQL Server · .NET Core · C# · JavaScript · HTML5 · CSS3 · Tailwind CSS

QA & Test Automation: Pytest · Selenium · Playwright · Cypress · Appium · API Automation · E2E Testing · Integration Testing · Performance Testing · JMeter

DevOps & Engineering: Git · GitHub · GitHub Actions · Azure DevOps · Jenkins · CI/CD · Docker · AWS

EXPERIENCE

Software Test Engineer

Jan 2024 – Present

Technevy Inc · Shigar

- Architected and implemented end-to-end web test automation frameworks from scratch using Python, Pytest, and Selenium for the CareKnox compliance/scheduling portal and ShiftKnox/Shift Portal.
- Designed reusable, scalable automation architecture covering smoke, regression, integration, and E2E testing.
- Built API automation and validation for critical backend services.
- Engineered mobile automation with Appium and performance testing with JMeter; identified bottlenecks and validated API response-time improvements from ~30s to under 2s.
- Integrated automation suites into CI/CD pipelines in collaboration with DevOps teams, reducing manual testing effort by approximately 80%.
- Developed an AI-powered self-healing automation capability that detects changed or broken UI locators at runtime and recovers using alternative locator strategies.

Full Stack Development — Part Time

Jan 2023 – Jan 2025

Lamstan Technologies · Skardu

- Designed and developed a full-stack Fleet Management System using React, Tailwind CSS, Node.js, Express.js, REST APIs, and MySQL.
- Implemented authentication, role-based access control, CRUD operations via stored procedures, pagination, filtering, and dashboard analytics.
- Optimized application performance and implemented LLM-assisted CRUD workflows for create, edit, and status operations.
- Live Demo: <https://fleetsupporter.vercel.app/>

Full Stack Developer — 6-Month Internship

Jan 2021 – Jan 2022

Softify Technologies · Rawalpindi, Pakistan

- Developed full-stack features using .NET Core, C#, Razor Pages, REST APIs, and SQL Server.
- Designed database models with Entity Framework Core (Code First) and implemented CRUD operations.
- Built user-facing interfaces in HTML, CSS, C#, and Razor Pages integrated with backend APIs.

Junior Full Stack Developer

Jan 2022 (2 months)

Creative Garage · Islamabad, Pakistan

- Contributed to frontend and backend development using .NET technologies and SQL Server.
- Built database-driven features and integrated user interfaces with server-side logic.

SELECTED PROJECTS

BuildMind ERP — Multi-Tenant SaaS ERP Platform

Live Demo: <https://buildmind-cc.vercel.app/>

- Designed and developed a scalable multi-tenant SaaS ERP platform with company onboarding, role-based access control, user management, business workflows, REST APIs, administrative dashboards, and automated testing.

AI Customer Support Agent — Agentic AI & Workflow Automation

Live Demo: <https://supportpilot-saas.vercel.app/>

- Designed and developed an AI-powered customer support platform using Python, FastAPI, React, REST APIs, and MySQL. Implemented LLM-powered agent workflows with RAG-based document retrieval to answer customer queries, create support tickets, and escalate complex issues to human agents (human-in-the-loop).

AI Self-Healing Test Automation Framework

- Built an AI-powered self-healing automation capability that detects broken or changed UI locators at runtime and identifies alternative locator strategies to improve automation resilience and reduce test maintenance (Python, Pytest, Selenium).

Finger Spelling Detection Using Machine Learning

University of Baltistan Skardu

- Built a hand-gesture recognition system using OpenCV and MediaPipe landmark extraction; classified gestures with SVM and Random Forest and evaluated accuracy, precision, recall, and F1-score.

EDUCATION

BS Computer Science — University of Baltistan Skardu

2018 – 2021

Intermediate — Girls Degree College Skardu

2015 – 2017
